IT/COMPUTER TRAINING COURSES (Lent Term 2009)

The Computing Service offers the following IT training courses which are free for current staff and students of the University. Most courses start at 14.15 and end by 17.00 and are held at the New Museums Site, but there are exceptions so please check times and venues when registering. Some are entirely practical, while others take the form of a lecture and demonstration followed by a practical session, and a few consist of a lecture only. All information including times, locations and descriptions is provided on the web (<http://www.cam.ac.uk/cs/courses/>) A printed timetable may be obtained from Computing Service Reception. The programme is published termly, so that the next programme after this one will be in the Easter Term, starting in late-April 2009. In addition to instructor-led courses 'self-teach' materials are available (see below), and the Computing Service also provides documentation on many topics in the form of handouts, information sheets and leaflets (see web page <http://www.cam.ac.uk/cs/docs/>).

It is essential to register, preferably by completing the online form at <http://www.cam.ac.uk/cs/courses/> If this is not possible, bookings may also be made by email to course-admin@ucs.cam.ac.uk (tel. (3)34662) or in person at Computing Service Reception, New Museums Site, Pembroke Street. Bookings will be confirmed automatically and reminders sent a couple of days beforehand providing a valid email address is supplied. A standby system is used for oversubscribed courses; priority will be given to those who have booked in advance and who arrive in good time. If unable to attend for any reason, please cancel bookings giving as much notice as possible so that someone else may take the place, and to avoid waste of resources such as excess copies of printed notes.

It should be noted that, unless otherwise indicated, all courses assume basic computing skills; only those marked 'Novice friendly' are suitable for those with no previous experience.

* indicates that some prior knowledge or experience of the topic is required, in addition to basic computing skills, as detailed in the individual course descriptions. In all cases this may be acquired by attending one or more of the introductory courses.

Self-Teach Computer Training Courses

In addition to the programme of formal courses, a selection of self-paced training material is provided for loan, or in some cases purchase, from Computing Service Reception, New Museums Site, Pembroke Street. Topics for which there are self-teach materials on offer at the time of going to press are listed below, but new ones are added from time to time. As well as duplicating topics covered on the taught courses, for the benefit of those who cannot attend or who prefer this method of learning, they cover other subjects and also more advanced volumes. It is advisable to ring (3)34600 to check availability beforehand. A deposit of £50 is required for courses which are borrowed; this usually takes the form of a cheque which is returned when the material is brought back on time and in good, fully usable condition. Some courses require a specific version of the software to be installed on the computer being used; in some but not all cases Computing Service facilities may be used. As with most commercial software, there are licence restrictions which forbid copying of courseware, unless expressly permitted. There is a description for each course giving details of version, medium and topics covered on the web at <http://www.cam.ac.uk/cs/courses/>; printouts can be generated if these are not accessible.

Long Vacation Courses 2009

Computer Science Tripos

A course on Programming in Java is provided for those who intend to take Part Ib of the Computer Science Tripos from October 2009, but who have not previously taken Part Ia. Part Ib of the Computer Science Tripos may be taken in a student's second year (leading to Part II of the Computer Science Tripos) or in a student's third year (leading either directly to a BA or to Part II in the fourth year).

The Programming in Java course, which will be given by Dr F. H. KING, will begin at 9 a.m. in the Hopkinson Lecture Room on the New Museums Site, on Monday 13 July, and will end on Friday 24 July. The course consists of lectures, demonstrations, and practical work.

Other current students and members of staff are welcome to attend, and should book a place on the course by sending an email to Christine.Northeast@cl.cam.ac.uk.

The *Cambridge University Reporter* appears on Wednesdays during Term. Special Numbers are also published from time to time.

Printed in the United Kingdom at the University Press, Cambridge and published by Cambridge University Press,
The Edinburgh Building, Cambridge, CB2 8RU.
Registered at the Post Office as a newspaper.
